

Fantasy Sports Math League

For Parents: How FSML Helps Middle Schoolers Love (or at Least Like!) Math

WHAT PARENTS NEED TO KNOW: FSML combines fantasy football with real math practice. It works for boys and girls who already love math AND kids who don't—because it turns fractions into something they actually want to do. Students draft teams, track players, and calculate scores using math operations in each part of the game every week.

THREE TYPES OF KIDS WHO LOVE FSML:

 Math Lovers Kids who already like math get to apply their skills in a fun, competitive way	 Football Fans Kids who follow the NFL suddenly have a reason to practice fractions weekly	 Game Players Kids motivated by competition, leaderboards, and winning turn math into gameplay
---	--	--

WHAT KIDS ARE SAYING (Real Student Voices):

 "Playing FSML made me more excited about coming to class and math used to be my least favorite, and then that changed." — 6th grader	 "I looked forward to Tuesdays so I could do my points on FSML!" — 8th grader
 "I loved it overall. I loved competing with others. I absolutely loved it. It was a fun educational way to learn math." — 6th grader	 "I have gotten so so fast at calculating! I also think I did pretty well on setting my lineup as I was on the leader board!" — 6th grader
 "It made me feel more confident in my fractions." — 6th grader	 "It made me think that math can be fun and it's not that hard." — 7th grader

THE LEARNING OUTCOMES (What Your Child Gains):

+1.38 Math Problems Improved	+0.50 Fraction Confidence Gain	69% Practiced Multiplying Fractions	57% Enjoyed It 'A Lot'
--	--	---	----------------------------------

WHAT MAKES IT WORK:

- Real math practice: Students solve fraction problems every week to score their players
- Self-paced: Kids work at their own speed, get immediate feedback from the platform
- Screen time with purpose: This isn't just gaming—it's building algebra-readiness skills
- Weekly routine: The task tracker on the home page let's players know when to complete each task
- Safe & supervised: Used in school, COPPA and FERPA compliant, no ads and no online chat

FOR PARENTS: Whether your child already loves math or needs extra motivation, FSML gives them a reason to practice. Fractions are the foundation for algebra—this makes sure they're ready. Students tested in Fall 2025 showed real gains in both performance and confidence. Ask your child's teacher about bringing FSML to your school.
